

PICTORIAL REPORT — CERRO OPEN HOUSE, NOVEMBER, 1967

Special Edition - BRASS LOG

Volume 6 December 1967 No. 4-A

1. Boarding bus at athletic field for trip to plant.

News coverage of our series of Open House activities at the Bellefonte Works, beginning with the "private" Cerro employee-family open house held Friday, November 10th, followed by the public open house on Monday, November 13th, and concluded with the formal dedication of CERRO-BELLE by Governor Shafer on Wednesday, November 15th, has been well handled by local, state and national news media. Some stories in leading trade press publications are still to come.

So much has been "said," in fact, that we thought our readers might just enjoy a "pictorial" report, featuring primarily some candid photos taken during employee-family day, with a few shots of the formal dedication ceremony thrown in.

Hope you enjoy looking over the photos and seeing how many fellow-employees, friends, and relatives you can identify. For the record — approximately 3100 "guests" toured our facilities on November 10th; about 3400 on the 13th, and approximately 110 on the 15th.

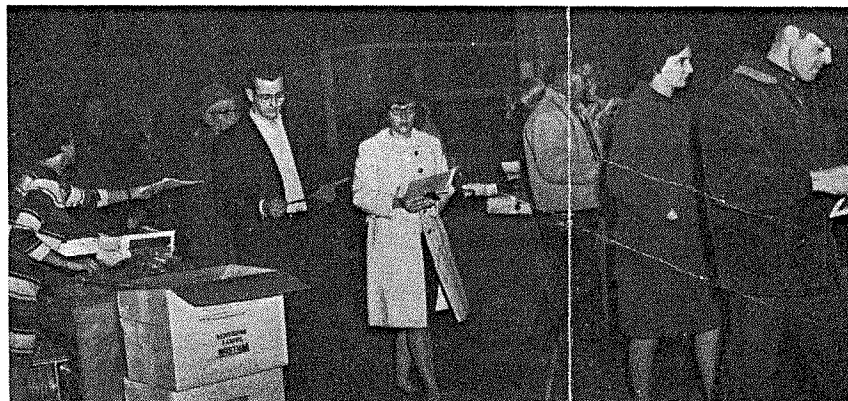

Again, our sincere "THANKS" to all who helped plan and carry out these events and to those who attended.

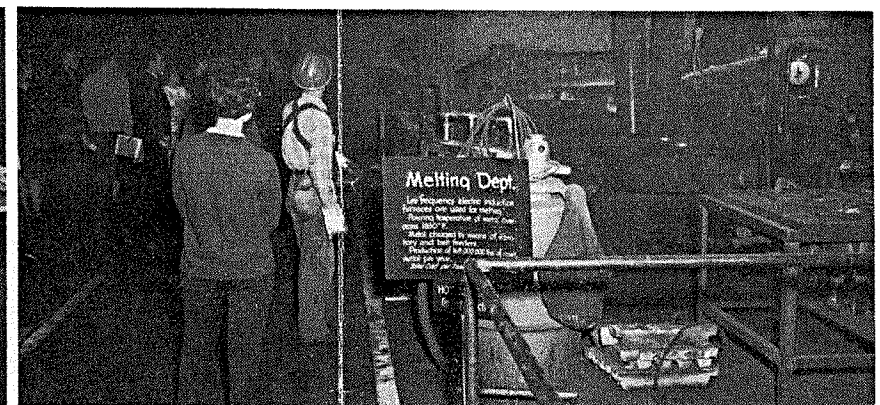

2. Welcome to Cerro!

4. First stop — Raw Material Control.

3. Registration — brochure, safety glasses, souvenir, etc.

5. On through Melting Dept.
